

Dear Sirs,I drive for a living. XM satellite radio has become the best thing for me to listen to. I no longer get out of range. I can listen to any type of content whenever I want. They are now offering instant weather and traffic reports to cities that I travel to.

I escort oversized loads which at times close up roads. The more information that we have about traffic conditions ahead of us the safer we are, and everyone else.

I have learned that the NAB is trying to stop XM from using traffic reports. This is a service that helps all drivers! Why would you want to stop this. Please Don't.

Sincerly Yours,  
Dennis Stratton
